**Von Pam McCutcheon : Caught in the Act (English Edition)** before purchasing it in order to gage whether or not it would be worth my time, and all praised Caught in the Act (English Edition):

KundenrezensionenHilfreichste Kundenrezensionen0 von 0 Kunden fanden die folgende Rezension hilfreich. zany comedic romance!Von Deborah MacgillivrayI utterly adore 1940s movies that centre on quirky romance between two people - generally who might have missed each other if it weren't for chance - that tosses them into bizarre but riotous situations. You always feel good at the end of one. The End flashes across the screen and there is a smile on your face.

Zebra is giving some fresh voices a chance to rediscover this style of madcap farce romance. One is the very talented Flo Fitzgerald. Another is Pam McCutcheon. When I read *The End*, closing that last page, there was a smile on my face. Scott Richmond leaves a charity gala. He is bored with his society life. This simple act changes everything. He catches a teenage cat burglar trying to steal his family's jewels. He has a very elaborate security system, which works to keep thieves out. Failing that, it keeps them inside until the cops come to collect them. Being this runt of a thief got in, Scott's curiosity tweaks his to know why she is trying to rob him. He listens to her tale of woe, how her father was the valet to Scott's father and was dismissed with a meager pension and died penniless. She spins a tale how she just wants to get enough money so she can go to Julliard and figures the money the gems would bring would compensate for the shabby treatment her father got from his after years of service. Her tale wins Scott over and he lets her go - with the jewels. A short time later, Scott catches another female breaking into his home. This time a bit more shapely. Nicole the big sister of Chrissie the cat burglar, has discovered what her little sister did and she hopes to return the jewels to Scott, before the real 'cat' is out of the bag - the jewels are fakes. With Nicole's assistance, Scott sets off to learn what happened to the real jewels. In their detective work, they are forced to play at being engaged. Soon, both are secretly wishing their engagement was the real thing. I really enjoyed the comedic romance, with strong characters that make you care. I missed McCutcheon's *My Favorite Husband*. So I am off to snag that one based on how much I enjoyed this story.

**Kurzbeschreibung** When rich, handsome Scott Richmond catches teenager Chrissie Dreyfuss with her hands on his mother's jewels, he lets her go on a whim since his family was responsible for the loss of her father's job. But when her gorgeous older sister Nicole shows up to stop her, they learn that Chrissie has already sold the jewels to some of his mother's friends. Unfortunately, they're fake and his mother is all too eager to collect the insurance. Now Scott and Nicole have to steal the fakes back before the buyers or the insurance company finds out his high society mother has tried to cheat them. (Sequel to *My Favorite Husband*) *Caught in the Act* is a zany, surprisingly sophisticated, screwball comedy reminiscent of the 1930s Hepburn movies. Scott is a terrific foible who plays the clown because that is what is expected by his peers and family. Only those who get inside like Nicole realize a fool could never have saved the family as he did. Pam McCutcheon provides an amusing with serious undercoating romantic romp starring two likeable protagonists and a solid support cast. Harriet Klausner
