entertaining adult fairy-tale for those who... Von Miki101. Micha ... like the protagonists created by Neil Gaiman, for example. Or are familiar with super-natural phenomena :-) ... Oliver Jones is a very simple-minded financial analyst, working with some small hedge-fund in San Francisco. His life is dull and without any surprises, it seems to him - and to the reader, too. Until one evening he talks with the stray-cat he is as usual feeding Thai food on his windowsill - and the cat talks back! Both are very very surprised by this event! Then suddenly the life of Oliver takes always more a turn to the interesting side, when a tax-inspector tries to kill him in his office. Saved in the last second, he has to leave his dull life behind and is recruited by Artemis - who seems to be a little girl of about 10 years - to join her group. Which - in top-secret style - is saving ever since the planet plus inhabitants from strange dangers like cyborgs, now extinct... Sally, some kinda out-of-her-mind gunslinger and Tyler, who likes wearing - and tearing - Hawaii shirts, are his new co-workers in the San Francisco branch of a world-wide organisation, which no-one obviously knows about. Oliver's life is in great danger because a "Matriarch" of a strange unhuman "Underground culture" has forseen him as the "Destroyer of Worlds" - but before all of her own race. And Oliver has one very important power, he is not able to control : He can change realities under certain circumstances... This first book of the Interesting-Times series is the often hilarious story of a dull man without a life, who is hiding much more than the eye can see. My favourite protagonist is without any doubt Jeffrey, the talking cat. But all the others too have so many things and facts to hide and discover, that the reader may find a surprise on every new page. Who likes Star Trek, Doctor Who, (mostly) friendly vampires, and loathes evil man-eating creatures - AND can imagine his or her cat ordering Thai shrimps or Chow Mein for dinner - here You are right! I like this first of a new series by Matthew Storm - the author of the Nevada-James crime stories "Broken" and "Scars" too - very much. He writes very good, has freshly new ideas and his books never lack original twists and turns. I have now bought the second exit "Interesting Places", too and the story is very promising and always in line with the ideas the author introduced in this "fairy-tale for adults". Who likes his or her books a bit "out of the normal" will surely not be disappointed here. That's my opinion - for what it's worth :-) ...2 von 2 Kunden fanden die folgende Rezension hilfreich. Einfach witzig und trotzdem nicht platt! Jederzeit empfehlenswert. Von Peabody Wer Star Trek oder Dr. Who mag, hintsinnigen Humor liebt und gerne lacht muss dieses Buch unbedingt lesen. Es ist zeitweise zum Kringeln komisch, verfgt aber ber genug Logik und innere Konsequenz, um es ernst zu nehmen. Allein die sprechende Katze ist ein paar Sterne wert, und die Dialoge der Hauptfiguren sind grtenteils genial. Unbedingt lesen! Wer sich jetzt fragt, warum ich trotzdem nur 4 Sterne verbe: 5 Sterne hebe ich mir auf fr Meisterwerke wie die Dresden-Serie von Jim Butcher oder die Farseer-Trilogie von Robin Hobb. 4 Sterne heit also, dass ich dieses Buch ehrlich liebe! 1 von 1 Kunden fanden die folgende Rezension hilfreich. Hilarious and fun to read Von Hoener, Birgit At first, I thought this was a book for children, not sure what made me think that, maybe the choice of words and the narration style a bit in the first chapter. But that very quickly changed - the story developed quickly, Oliver's life changed from boring to very interesting in a matter of hours, and the way the story is told made me chuckle frequently. Boring meets supernatural and has to cope - hilarious! The plot is great, the protagonists are fun and have witty dialogues, the narration style is easy and has a good flow - the only problem with this first book in a series was that it was too short. If you like Douglas Adams and Terry Pratchett, you will like this one. I will definitely try and get the second one in this series.

Kurzbeschreibung Oliver Jones is the most dangerous man in the world. At least, someone out there believes he is. Oliver himself thought he was one of the world's duller men, working as a financial analyst in San Francisco by day and eating microwave dinners by himself every night. That was until he befriended a stray cat, and then one lonely night the cat began to speak to him. Now Oliver is on the run, hunted by an inhuman assassin whose client believes Oliver is the "Destroyer of Worlds." His only hope for survival rests with a trio of unlikely new allies: A werewolf with a fondness for Hawaiian shirts, an emotionless little girl who is much, much older than she appears, and a genocidal gunfighter with a serious anger management problem. And there's that talking cat, of course. But that's a little harder to explain... Kurzbeschreibung Oliver Jones is the most dangerous man in the world. At least, someone out there believes he is.
