Fear this author!Von Detra FitchFreeman Mills is diagnosed with rapid-cycle manic depression (bipolar) with suicidal tendencies, kleptomania, antisocial behavior, cyclothymia, and mid schizoprenia. As long as Freeman can remember, his dad had used him as a guinea pig for experiments. Dr. Kenneth Mills (a.k.a. "Dad") was once an esteemed clinical psychologist. Then Freeman's mom was killed and Dad was locked in an insane institution. However, the damages to Freeman were already done and ran deep. But that was years ago. That is all in the past. Now Freeman is twelve-years-

old and has just been transferred to yet another group home. Wendover Home is located in the Southern Appalachian Mountains of North Carolina. The Wendover Home, itself, has a long and dark history. During the Second World War it had been a state mental hospital where inhumane experiments were conducted on mentally unstable patients. Many people died within cells located in the Home's basement. Though the Home is now used as a group home for children, the basement cells remain. Some items have also been added within the basement. There are glowing generators, metal cylinders, Liquid Nitrogen, advanced superconductors, and so much more. All of it is hooked directly to Room Thirteen above. Dr. Richard Kracowski treats the children in Wendover Home. Room Thirteen is where Dr. Kracowski gets to play God. The doctor calls the electroshock treatments "Synaptic Synergy Therapy". He kills his patients to help their brains align harmonically. When the children come back to life they find themselves altered. For a temporary time the kids have telepathy, clairvoyance, and/or precognition abilities. After each treatment, the abilities last longer. Freeman finds an unlikely ally in another child named Vicky Barnwell. Other than Freeman, Vicky's powers are the greatest. As the two warily learn about each other, they begin noticing new oddities around Wendover. The experiments in Room Thirteen have awakened those in the basement from their eternal rests. Being covered up long ago and forgotten are returning. ***** Author Scott Nicholson has become my favorite writer of the Horror genre. No one else can quite resurrect horrors that will haunt your dreams for years to come. Scott Nicholson is simply unforgettable. Don't believe me? Pick up a copy of this novel. I dare you! You'll never think of your basement again without wondering if anything in its past may come back to play with you. Highly recommended! ***** Reviewed by Detra Fitch of Huntress Reviews.

Kurzbeschreibung "Scott Nicholson understands that the best horror novels achieve primal fear through a combination of sustained atmosphere, richly drawn characters, and believable if uncanny evils that draw unholy power from everyday lives. Christopher Ransom, author of the *The Birthing House* TROUBLED When twelve-year-old Freeman Mills arrives at Wendover, a group home for troubled children, it's a chance for a fresh start. But second chances aren't easy for Freeman, the victim of painful childhood experiments that gave him the ability to read other people's minds. Little does Freeman know that his transfer was made at the request of Dr. Richard Kracowski, whose research into the brain's electrical properties is revealing new powers of the human mind. Kracowski is working for a secret society called the Trust, but also has his own agenda in exploring the nature of the soul. His experiments have an unexpected side effect, though. The electromagnetic fields used in his experiments are summoning the ghosts of the patients who died at Wendover back when it was a psychiatric ward. Freeman simply wants to survive, take his medicine for manic depression, and deceive his counselors into believing he is happy. When he meets the anorexic Vicky, who may also be telepathic, he's afraid some of his darkest secrets will be uncovered. But when the other children develop their own clairvoyant abilities, and insane spirits begin haunting the halls of Wendover, he can't safely hide inside his own head anymore. Meanwhile, the Trust is installing sophisticated equipment in the home's basement, aggressively probing the threshold between life and death. And they've brought in another scientist who doesn't share Dr. Kracowski's reluctance to push the limits. This scientist is a pioneer in ESP induction, and he performed most of his work on a very special subject: his son, Freeman Mills. From the award-winning author of *The Red Church*, *Speed Dating with the Dead*, *Drummer Boy* and more, This is Scott's preferred, DRM-free edition of the 2005 U.S. paperback *The Home*, which is in development as a feature film. ----- "Always surprises and always entertains." --Jonathan Maberry, *The Dragon Factory* "Like Stephen King, he has an eye and ear for the rhythms of rural America, and like King he knows how to summon serious scares. My advice? Buy everything he writes." -- Bentley Little, *The Store* From Publishers Weekly When Freeman Mills, a 12-year-old boy with the power to read minds and an endearing affinity for Clint Eastwood movies, arrives at the former mental institution known as Wendover Home in the Southern Appalachian mountains, he vows to tolerate the facility's psychological treatments and religious rhetoric, but refuses to make friends or reveal his ESP. He soon finds out, however, that no one keeps secrets within the aging walls of Wendover despite the best efforts of its administrators, doctors and counselors, many of whom are involved in conducting risky shock-therapy experiments on the children. When the research goes awry, Wendover and its inhabitants get caught between the real world and the "deadscape" a parallel universe in which long-buried ghosts from the mental institution haunt the living. Nicholson (*The Red Church*) offers plenty of faith-challenging questions as the tale moves briskly to its unexpected conclusion, yet not without losing some credibility. Freeman and other young characters are given dialogue and thoughts well beyond their years, while the deadscape is at times more confusing than scary.
