FindVon DarkDianoraThe Invisible Chains - Part 1: Bonds of Hate is an intriguing, rich and well-written fantasy story in a medieval setting. I ran through a gamut of emotions while reading it, there were scenes of violence and cruelty, and heartbreak - never gratuitously, though - while on the other side there was light-hearted, funny banter that made me giggle. A roller-coaster ride that had me clinging to the edge of my seat. A good long read!

KurzbeschreibungAnaxantis, prince of Ximerion. You will hate him... if your heart isn't big enough. While the kingdom of Ximerion is threatened at its southern border by a major power, the high king sends his two youngest sons, the half brothers Anaxantis and Ehandar, as Lord Governors to the Northern Marches where minor raids by wild barbarians are expected. Under the guidance of an old and trusted general, the king hopes to keep the young princes far from the major conflict in the south, while at the same time providing them with a valuable learning experience. The estranged half brothers are rivals, but soon they feel attracted to each other. As if this was not enough of a complication, they begin to suspect that they were set up by their own father. The result is a fierce struggle for power where the lines between hate and love become almost indistinguishable and where nothing is what it seems.
